

BAUMGARTEN CATTLE CO.

21st ANNUAL PRODUCTION SALE

Friday, February 2, 2024 • 1:00 p.m. MST

at the ranch south of Belfield, ND *(call or check our catalog or website for directions)*

WELCOME

It is with great pleasure that we welcome you to our 2024 bull sale. This year marks 109 years of Baumgartens breeding Herefords and our 21st annual production sale. 2023 was a big year for our family as Rollie and Wendy officially adopted Isaiah and Benjamin, as well as Savanna and Jake welcomed their new baby boy, Colt Hilbert Baumgarten. All four boys here love being involved in daily ranch activities and that makes us more proud than any cattle we could ever raise. Cattle prices are on the rise and look to reach all-time highs in the near future. Now more than ever is the time to invest in high quality cattle and predictable genetics to build back cow herds.

We have always had a philosophy of looking into the future and building a cowherd that benefits us not only for the next year but for decades to come. This is top priority. This futuristic philosophy comes into play every time we choose our next herd sire, which cows to flush, which AI sires we use and cow herd management. This also comes into play in our culling process for high fertility, good uddered cows that wean big calves and stay in good body condition. Quality feet, structure and eye appealing cattle with balanced traits are a must as well. We believe that a cow should work for you not the other way around.

Structural soundness, performance and balance are our top priorities. We want these bulls to sire vigorous calves at birth and wean big, heavy calves. We want them to leave you with cows that are functional, broody and milky while maintaining correct body condition without being pampered. This year's offering will be as deep in quality as ever. Bulls were cut due to high birth weights and inadequate performance. We feel every animal in the sale has more than adequate structural soundness. If they're borderline in this quality they are cut. We are proud and humbled with our genetic improvement.

Thank you for considering our cattle and we invite you to come tour our cow herd and bulls any time of year. Please contact us with any questions. Our main focus is for you to feel comfortable and confident with your purchase. Remember the fastest and cheapest way to add pounds is crossbreeding and the baldy cow is the most profitable cow!

The Baumgarten Family

Jake, Savanna, Colt and Theodore

Wendy, Rollie, Isaiah and Benjamin

PERKS BEHIND THE Z DIAMOND BULL

Performance oriented, maternal driven consistently

Structure

We select very strictly for sound feet and legs, this in return will have longevity in foot structure which will result in more breeding season for a bull.

First Breeding Season Guarantee

All bulls are guaranteed sound breeders and have a first season guarantee. Breeding season is defined as the 60-day period following the first turnout. Seller must be contacted as soon as buyer is aware of a problem and before bull is disposed of. All claims must be submitted to seller within 8 months of sale date. In case of adjustment, it will be made with a replacement animal of equal value or credit for next year's sale.

Free Delivery

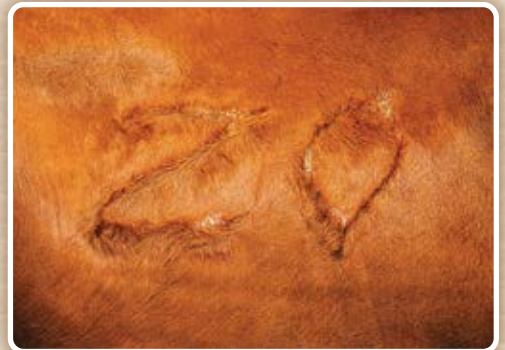

We offer free delivery on registered stock within the first 500 miles after that we will work with buyer for further arrangements. If we can meet at central points it's always appreciated but we will do our best to bring them right to your front door!

Bulls Fed Free Until April 1

We will feed all bull calves free until April 1. They will be kept on a high roughage ration to get them in shape for breeding season. Sometimes life happens and we don't get bulls delivered right on that day. That is on us, and we will keep feeding them free for a week or two longer or till we get them to you.

Sight Unseen Guarantee

We offer this guarantee if you talk to us before the sale. We would love to assist you in the purchase of your bull either way and always suggest you come look in person. Yet in the case you can never make it to the ranch we will help find the bull you're looking for and guarantee you will like him! Talk to Rollie or Jake for more information.

BAUMGARTEN PRODUCTION SALE

Friday, February 2, 2024 • 1:00 p.m. MST

at the ranch south of Belfield, ND

Selling: 62 Yearling Hereford Bulls • 8 Two-Year-Old Hereford Bulls

11 18-Month-Old Hereford Bulls • 7 Registered Hereford Bred Heifers

4 Registered Hereford Heifer Calves • 40 Commercial Hereford Heifer Calves

JOIN US FOR A FREE LUNCH! Will feed bull calves for free until April 1st.

Our first preference is to have everyone at the sale who is interested in our cattle. We realize this is not always possible due to our busy lives and commitments. We encourage our customers to come and visit any time prior to the sale. We are happy to show you our offering this year as well as our cow herd and answer any questions. We will gladly make time for you. We are never too busy. You also have the option of looking at the cattle alone if that is your preference. All the cattle can be viewed on our website and there are videos of the bulls as well. You have the opportunity to bid on DV Auction if you can't attend the sale. Our sale representatives are also available to take phone bids on sale day.

If you have questions about specific lots please reach out to Rollie, Jake or Todd and they will be happy to answer your questions about this great offering of bulls we have this year.

Genetic Defects

All animals will be tested for any known genetic defects. The Hereford breed has found a new defect called DB and any carriers will be updated in our online catalog. DB is a simple recessive gene, so the only way it can be a problem is if two carriers are mated to one another. This will have no affect when using bulls on other breeds.

NATIONAL CATTLE EVALUATION TERMS

EPD — EXPECTED PROGENY DIFFERENCE:

Estimate of a bull or cow's future progeny performance compared to progeny of a breed average sire or dam. EPDs are expressed in actual pounds, plus or minus, for birth, weaning and yearling weights and maternal performance.

2022 HEREFORD BREED EPD AVERAGES

CED	BW	WW	YW	MILK	M&G	SC	REA	MARB.	BMI\$	CHB\$

CED — Calving Ease Direct

BW — Birth Weight

WW — Weaning Weight

YW — Yearling Weight

MILK

M&G — Milk & Growth

SC — Scrotal Circumference

CEM — Calving Ease Maternal

REA — Ribeye Area

MARB. — Marbling

BMI — Baldy Maker Index

CHB — Certified Hereford Beef Index

SCROTAL EVALUATION

Age in Months	12-14	15-20	21-30	30 plus
Acceptable Range (cm)	30-35	31-37	32-39	33-40

SC — SCROTAL CIRCUMFERENCE:

A measure of fertility. Testicle size indicated by scrotal circumference measured in centimeters is a highly heritable trait very much correlated to reproductive efficiency. A valuable indicator of bull fertility and puberty, and highly related to early puberty in heifers and cow fertility, increased bull scrotal circumference should improve fertility and inherent cow herd productivity.

Sale Accommodations

Trapper's Inn 701-575-4261

Cowboy Inn 701-575-4245

Please reserve rooms ahead of time. Due to oil activity rooms are limited.

Theodore Roosevelt Regional Airport, Dickinson, ND

Special Announcement

Check out our website for further updates, sale bull pictures and videos and sale catalog at www.baumgartencattle.com.

TERMS AND CONDITIONS: Terms of the sale are cash. Every animal will be sold to the highest bidder with the auctioneer settling disputes as to bids. Announced changes in catalog information sale day take precedence over printed material in this catalog. All cattle are the buyer's property as soon as sold. Bull calves returned to seller will be fed free until April 1st. Feeding arrangements will be made on bull calves only. We would appreciate that all bull calves we feed be insured. Neither the owners nor any person connected with this sale or catalog assumes any liability, legal or otherwise. Animals that are being cared for by seller are done so at the purchaser's risk.

EMBRYO TRANSFER PROGRAM: Just a short note here to advise you about some information on our ET program. Please remember that the calves that are ET calves are not raised on their natural mother, but instead a recip cow. Some of these recip cows do not have that natural ability to milk and feed a calf the way the original ET mama cow does. Therefore, sometimes the performance of an ET calf is not as good as her natural calf is, but the genetics are still there to produce that type of performance.

ABSENTEE BIDS: Anyone wishing to bid who cannot attend the sale may place phone or mail bids by contacting Rollie or any sales representative.

HEALTH: Health of the Baumgarten herd is excellent. State is Bovine Brucellosis free and Accredited Bovine Tuberculosis free. Females are officially calfhooed Bangs vaccinated. Individual health papers will be furnished for shipment anywhere.

REGISTRATION AND TRANSFER:

Registration certificates will be transferred to buyers upon request at seller's expense. When making settlement, buyers must give complete written name and address information for making transfers.

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

619's popularity has exploded in the breed and is leaving a positive impact. He's one of those sires that breeds on true to his type consistently. You can always pick out 619 offspring. His offspring are deep, easy doing and dense made that come easy at birth and gain extremely well. Sons have big testicles, carry extra thickness and are wide backed with the breeding bull look. Females are feminine with a ton of capacity and have small, tight udders. We feel there will be a ton of longevity in his daughters as well as granddaughters. A true breeder that keeps so many great qualities in balance. Ratios 98.8 for BW on 477 head, 100.4 for WW on 456 head and 100.7 for YW on 336 head across the breed. Two horned sons sell as well as many sons of daughters. Owned with Stuber Ranch.

Very similar to 619 in his type and kind with a straight L1 pedigree. Heavily used on heifers and on cows with success. If you're looking to raise replacements his sons are highly recommended. They should breed on great udder quality with strong milk and broody, easy doing females. If you were to go through our replacement pen you would see the ability of 917 to make top notch females. When you study his pedigree you can see the maternal strength for generations. Many sons will be heifer bulls. He has consistently sired big testicled, easy doing bulls with loads of fertility. They will be the low maintenance kind. 15 horned sons and one daughter sell. Owned with Holden Herefords.

Power, pigment and structural soundness makes 1152 a very unique HERD BULL. His mother is stout and functional! His offspring tipped the scales and ratioed 102 on weaning weight! His soundness will result in correct feet that will give you extra longevity. Consistently sired length and eye pigment. We think his daughters will play a big impact in our future! In his rookie year he gave us 10 horned sons and 1 daughter to be offered.

We bought a semen package on Hodgeman after seeing him in person. It's hard to find a bull with this much power and high quality carcass traits. His highlights are definitely in our replacement pen! His sons here will be the only calves to sell in America in 2024. They are stout, burly and just powerful. Check out his sons' WW, YW, Marbling and CHB EPDs! Performance driven, maternal driven. 7 sons sell.

REFERENCE DAMS

BCC SCARLET 315A - P43418823

We flushed 315 heavily in the fall of 2021 due to her amazing track record, picture perfect udder and we just love her type and kind as a cow. Her record on 7 calves was 97.9 on BW, 103.4 on WW & 102.2 on YW. She really clicked with Houston and Rio and we think these will be some of our most potent polled genetics. A cow that was picture perfect in so many ways and flat out produced GOOD cattle. 6 direct sons sell as Lots 3147, 3162, 3185, 2302, 2310 and 2311.

CED	BW	WW	YW	MILK	M&G	REA	MARB.	CHB\$
+7.7	3.4	46	77	23	46	.26	.12	109

BCC L1 DOMINETTE 454B - 43511126

Another picture perfect cow in terms of phenotype and udder quality. A top producer that raised our top seller in 2021 to John David Moore of Texas. She has been flushed multiple times and held a calving interval of 372 days as well as ratioing 100.8 on BW, 101.1 on WW and 103.3 on YW on 8 head. There is high fertility coupled with great milk as well as perfect feet and legs at 10 years old from this donor. Direct sons sell as 3182, 3214 and 3215. Grandsons sell as 3117, 3119, 3165.

CED	BW	WW	YW	MILK	M&G	REA	MARB.	CHB\$
+3.6	2.9	51	81	27	52	.29	.13	112

SHF TIME 001A D81 - P43676395

D81 (Dorothy) has really hit it out of the park here in the last two years. In 2023 her son, Sunrise, topped our sale to ABS. This year we will have a larger selection of calves by her with the same quality. She is starting to leave her mark in the breed and will continue to. We are confident she will transfer her amazing udder and teat structure, mothering ability, calving ease and performance into her descendants for generations to come. She will be a building block for our polled herd for a long time. Direct sons sell as 3159, 3170, 2305 and 2310. Grandsons 318, 3L and 4L.

+11.7	-2.0	55	84	35	62	.24	.24	128

CL 1 DOMINETTE 617S - 42673551

617 has had more influence in our herd than any other cow we have. In her lifetime she has produced 104 head through ET and natural calves. To appreciate this cow to a new level she held together an impressive udder, ideal feet and body condition until 12 years old, after feeding a big calf every year of her life ratioing 101 on BW and 107.4 on WW, 41 daughters average 102 on WW. That is proof of high milk. Good cattle out produce themselves generations to come and that is what she's done for us. Her influence in this year's sale include 321, 329, 333, 360, 370, 384, 389, 393, 3117, 3120, 3186, 3207, 276, 2200. Performance oriented, maternal driven consistently!

+5.6	3.5	50	73	34	59	.30	-.08	84

Footnote Guide:

We feel we know our cattle to a high degree. With that said our footnotes are merely a guide to how each individual can be expected to perform for you. With enhanced GE EPDs there is more confidence as to how a bull will breed, yet still never 100%.

When we explain Top % for traits this means they are outliers within the entire breed and in the top %. For example Top 5% for CE & BW means they're in the top 5% of the breed for CE & BW. CE-calving ease, BW-birth weight, WW-weaning weight, YW-yearling weight, SC-scrotal circumference, MM-milk, M&G-milk and growth, UDDR-udder quality, TEAT-teat size, REA-ribeye area, MARB-marbling, BMI-Baldy Maker Index, CHB-Certified Hereford Beef.

Ratios for BW and WW mean that individual's ratios for actual birth weight and 205-weight within our herd and their age group (contemporary groups). EP stands for eye pigment, LE is left eye and RE is right eye. For example 100% EP LE & RE means that bull has 100% eye pigment in both eyes. We hope you take the time to read our footnotes and we are only one call away to find the best bull for your program.

Small scurs. HERD BULL DELUXE! A maternal brother to BCC Sunrise 243K ET and SHF Harvest D287 H033 ET. 3170 is in the top 2% of the breed in 10 different traits. TOP 1% FOR ALL INDEXES. His dam, D81, not only has a proven track record but has the most beautiful udder structure and teat size. On top of that she can flat feed a calf at side not to mention her perfect foot conformation. Phenotypically he's very good, plenty of rib, balanced and bold with a ton of muscle. He will see heavy use in our herd!

Top 1% WW, SC, MM, MG, TEAT, BMI, BMI, CHB, 2% UDDR, CW, 3% YW, 6% MARB, 18% REA, 35% CE, BW.

Goggle eyed. Full brother to 3159, maternal brother to 2305 & 2312. Terms to be announced on Sale Day.
