

BAUMGARTEN CATTLE CO.

23rd ANNUAL PRODUCTION SALE

Friday, February 6, 2026 • 1:00 p.m. MST

at the ranch south of Belfield, ND

WELCOME

It is with great pleasure that we welcome you to our 2026 bull sale. This year marks 112 years of Baumgartens raising registered Herefords, this is our 23rd annual production sale. Cattle prices continue to be very profitable which is great to see such a bright future. Now more than ever is the time to invest in high quality cattle and predictable genetics to build back cow herds.

Like most ranchers in our area, we had a very good summer with plenty of rain. Our grass was abundant and our hay crop plentiful.

We are very blessed to have five children on our place between the age of one and eight. They all love the farm and ranch life. Enjoying everything from checking crops and cows to cutting net wrap off the bales.

Structural soundness, performance and balance are our top priorities. We want these bulls to sire vigorous calves at birth and wean big, heavy calves. We want them to leave you with cows that are functional, broody and milky while maintaining correct body condition without being pampered. We believe bulls with high quality maternal traits that are backed by good cows are more profitable to build your herd. This year's offering will be as deep in quality as ever. Bulls were cut due to high birth weights and inadequate performance. We feel every animal in the sale has more than adequate structural soundness. If they're borderline in this quality, they are cut. We are proud and humbled with our genetic standard.

Thank you for considering our cattle and we invite you to come tour our cow herd and bulls any time of year. Please contact us with any questions. Our main focus is for you to feel comfortable and confident with your purchase. Remember the fastest and cheapest way to add pounds is crossbreeding and the Baldy cow is the most profitable cow!

The Baumgarten Family

Jake, Savanna, Theodore, Colt and Lainey

Wendy, Rollie, Isaiah and Benjamin

PERKS BEHIND THE Z DIAMOND BULL

Performance oriented, maternal driven consistence

Structure

We are very strict in our selection for sound feet and legs. This in return will increase longevity in foot structure which will result in more breeding season for a bull.

First Breeding Season Guarantee

All bulls are guaranteed sound breeders and have a first season guarantee. Breeding season is defined as the 60-day period following the first turnout. Seller must be contacted as soon as buyer is aware of a problem and before bull is disposed of. All claims must be submitted to seller within 8 months of sale date. In case of adjustment, it will be made with a replacement animal of equal value or credit for next year's sale.

Free Delivery

We offer free delivery on registered stock within the first 500 miles. After that we will work with buyer for further arrangements. If we can meet at central points it's always appreciated but we will do our best to bring them right to your front door!

Bulls Fed Free Until April 1

We will feed all bull calves free until April 1. They will be kept on a high roughage ration to get them in shape for breeding season. Sometimes life happens and we don't get bulls delivered right on that day. That is on us, and we will keep feeding them free for a week or two longer or till we get them to you.

Sight Unseen Guarantee

We offer this guarantee if you talk to us before the sale. We would love to assist you in the purchase of your bull either way and always suggest you come look in person. Yet in the case you can't make it to the ranch we will help find the bull you're looking for and guarantee you will like him! Talk to Rollie or Jake for more information.

BAUMGARTEN PRODUCTION SALE

Friday, February 6, 2026 • 1:00 p.m. MST

at the ranch south of Belfield, ND

Selling: 76 Yearling Hereford Bulls • 6 18-Month-Old Hereford Bulls

14 Two-Year-Old Hereford Bulls • 10 Registered Hereford Bred Heifers

35 Commercial Hereford Heifer Calves • 17 Commercial F1 Baldy Heifer Calves

JOIN US FOR A FREE LUNCH! Will feed bull calves for free until April 1st.

Our first preference is to have everyone at the sale who is interested in our cattle. We realize this is not always possible due to our busy lives and commitments. We encourage our customers to come and visit any time prior to the sale. We are happy to show you our offering this year as well as our cow herd and answer any questions. We will gladly make time for you. We are never too busy. You also have the option of looking at the cattle alone if that is your preference. All the cattle can be viewed on our website and there are videos of the bulls as well. You have the opportunity to bid on DV Auction if you can't attend the sale. Our sale representatives are also available to take phone bids on sale day.

If you have questions about specific lots please reach out to Rollie, Jake or Todd and they will be happy to answer your questions about this great offering of bulls we have this year.

NATIONAL CATTLE EVALUATION TERMS

EPD — EXPECTED PROGENY DIFFERENCE:

Estimate of a bull or cow's future progeny performance compared to progeny of a breed average sire or dam. EPDs are expressed in actual pounds, plus or minus, for birth, weaning and yearling weights and maternal performance.

2023 HERFORD BREED EPD AVERAGES

CED	BW	WW	YW	MILK	M&G	SC	REA	MARB.	BMI\$	CHB\$
3.5	2.6	56	89	26	54	1.0	.46	.14	369	122

CED — Calving Ease Direct

BW — Birth Weight

WW — Weaning Weight

YW — Yearling Weight

MILK

M&G — Milk & Growth

SC — Scrotal Circumference

CEM — Calving Ease Maternal

REA — Ribeye Area

MARB. — Marbling

BMI — Baldy Maker Index

CHB — Certified Hereford Beef Index

Genetic Defects

All registered animals offered for sale will be tested for all known genetic defects. Any carriers will be noted in said animal footnotes.

TERMS AND CONDITIONS: Terms of the sale are cash. Every animal will be sold to the highest bidder with the auctioneer settling disputes as to bids. Announced changes in catalog information sale day take precedence over printed material in this catalog. All cattle are the buyer's property as soon as sold. Bull calves returned to seller will be fed free until April 1st. Feeding arrangements will be made on bull calves only. We would appreciate that all bull calves we feed be insured. Neither the owners nor any person connected with this sale or catalog assumes any liability, legal or otherwise. Animals that are being cared for by seller are done so at the purchaser's risk.

EMBRYO TRANSFER PROGRAM: Just a short note here to advise you about some information on our ET program. Please remember that the calves that are ET calves are not raised on their natural mother, but instead a recip cow. Some of these recip cows do not have that natural ability to milk and feed a calf the way the original ET mama cow does. Therefore, sometimes the performance of an ET calf is not as good as her natural calf is, but the genetics are still there to produce that type of performance.

SCROTAL EVALUATION

Age in Months	12-14	15-20	21-30	30 plus
Acceptable Range (cm)	30-35	31-37	32-39	33-40

SC — SCROTAL CIRCUMFERENCE:

A measure of fertility. Testicle size indicated by scrotal circumference measured in centimeters is a highly heritable trait very much correlated to reproductive efficiency. A valuable indicator of bull fertility and puberty, and highly related to early puberty in heifers and cow fertility, increased bull scrotal circumference should improve fertility and inherent cow herd productivity.

Sale Accommodations

Trapper's Inn 701-575-4261

Cowboy Inn 701-575-4245

Please reserve rooms ahead of time. Due to oil activity rooms are limited.

Theodore Roosevelt Regional Airport, Dickinson, ND

Special Announcement

Check out our website for further updates, sale bull pictures and videos and sale catalog at www.baumgartencattle.com.

ABSENTEE BIDS: Anyone wishing to bid who cannot attend the sale may place phone or mail bids by contacting Rollie or any sales representative.

HEALTH: Health of the Baumgarten herd is excellent. State is Bovine Brucellosis free and Accredited Bovine Tuberculosis free. Females are officially calfhood Bangs vaccinated. Individual health papers will be furnished for shipment anywhere.

REGISTRATION AND TRANSFER:

Registration certificates will be transferred to buyers upon request at seller's expense. When making settlement, buyers must give complete written name and address information for making transfers.

INSURANCE: Joana Friesz 701-400-8744

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

One of the most consistent breeding bulls ever used here. You will notice the consistency and quality in his offspring. His sons are short marked, powerful and easy doing. 2126 is backed by an amazing cow. Many daughters will be calved out by sale time, and they look to be very promising with high quality udders. If you keep or sell replacements this is a good sire group to tie into. Sons look like bulls and daughters look like females. Sons will breed on pigment big performance and top-notch females. Ratios 101.6 on BW with 165 head and 101.6 on WW with 145 head. 9 sons and 3 bred heifers sell. Owned with Cooper Herefords and Ridder Herefords.

A Paternal brother to 2126K that we used through AI. Bulls are extra deep with a dense look and have loads of muscle. There will be 6 full brothers by the 542 donor. They are very outstanding individuals. 267 offers performance with more carcass value. Dam is a 215 daughter which has always made top quality females. 7 sons sell.

Our popular high seller from 2023, he sure knocked it out of the park these last 2 years. He has moved to a double-digit calving ease and -2.2 BW while maintaining good performance. Calves come light and grow big. They are dark cherry red, long and correct with most being homozygous polled. 243 did a tremendous job and will see heavy use in the future. He's a herd builder and his sons will be as well. He is backed by a great cow. Daughters will be in production by sale time. We expect good things from them. Ratios 96 on BW with 135 head and 100 on WW with 85 head from multiple herds. 8 sons sell. Owned with ABS Global.

208 has done a world of good for us. Sons are easy fleshing, moderate framed, good haired and very similar in type & kind. Look up his sons if you like cattle with a little more power and punch. His daughters bred up great and are very fertile. Huge BMI bull that is in the top 1% of the breed. Sons will breed on with calving ease without sacrificing performance and add milk and fertility to your cow herd. 64 head ratio 97.7 on BW. 16 sons sell.

277 used for his added pigment, performance and carcass quality. He has a very impressive set of numbers to back him up in both growth and carcass. Sons are stylish with great rib shape and packed full of muscle. 277 has matured into a beast of a bull that is always in good condition. 12 sons sell. Owned with Harrell Herefords.

277

REFERENCE DAMS

SHF TIME 001A D81 - P43676395

D81 (Dorothy) has really hit it out of the park here in the last four years. Two of our main polled sires are both direct sons by her (Sunrise 243 & Debonair 3170) She has left her mark in the breed and will continue to for years to come. We are confident that her genetics will transfer her amazing udder and teat structure, mothering ability, calving ease, doing ability & performance into her descendants for generations to come. She will be a building block for our Polled herd for a long time. A large portion of our polled offering will go back to her in some way! 22 of her descendants are offered in the sale this year. She has 18 daughters in production that have an average WW ratio of 102.3 on 36 calves in multiple herds.

CED	BW	WW	YW	MILK	M&G	REA	MARB.	CHB\$
+11.6	-1.8	59	90	32	62	.23	.19	129

BCC L1 TAMA 542CET - 43623983

Straight L1 maternal icon here at the Baumgarten ranch. She maintained a perfect udder and foot quality throughout her career here! She is the kind of cow that is ultra feminine fronted, moderate and will raise the biggest calf. She will out produce herself with almost any bull she gets bred to. She's the ideal functional, top-notch producer. Ratios 98.6 BW & 106 WW on 9 head with an average calving interval of 373 days. She has 6 daughters in production, with 16 calves that have an average WW ratio 105.6. The set of ET calves this year are her best yet. They are quite special. You will see her genetic ability when you see them. Full brothers sell 5188, 5194, 5197, 5205, 5211 and 5213. Grandson 5133 and great-grandsons 5104 and 5203.

CED	BW	WW	YW	MILK	M&G	REA	MARB.	CHB\$
+7.1	1.0	42	64	50	71	.18	.06	100

BCC PHILLIS 130J - 44242186

A new young donor we are very excited about. The dam of last year's high seller, BCC North Star 4125, to Clay Carlson. She seems to be a genetic powerhouse as the few animals she's had are all high quality. To add to her impressive phenotype, she will raise one of our biggest calves every year with a tight udder and short teats. She has been flushed twice and bred right back. Her feet are also the way they should be. I think this cow will have a lot of influence in the future. Ratios 117 for WW on 3 head. Direct sons sell as 5123 & 5173.

CED	BW	WW	YW	MILK	M&G	REA	MARB.	CHB\$
+4.6	1.8	56	85	36	64	.65	.29	127

Footnote Guide:

We feel we know our cattle to a high degree. With that said our footnotes are merely a guide to how each individual can be expected to perform for you. With enhanced GE EPDs there is more confidence as to how a bull will breed, yet still never 100%.

When we explain Top % for traits this means they are outliers within the entire breed and in the top %. For example Top 5% for CE & BW means they're in the top 5% of the breed for CE & BW. CE-calving ease, BW-birth weight, WW-weaning weight, YW-yearling weight, SC-scrotal circumference, SCF-Sustained Cowherd Fertility, MM-milk, M&G-milk and growth, UDDR-udder quality, TEAT-teat size, REA-ribeye area, MARB-marbling, BMI-Baldy Maker Index, CHB-Certified Hereford Beef.

Ratios for BW and WW mean that individual's ratios for actual birth weight and 205-weight within our herd and their age group (contemporary groups). EP stands for eye pigment, LE is left eye and RE is right eye. For example 100% EP LE & RE means that bull has 100% eye pigment in both eyes. We hope you take the time to read our footnotes and we are only one call away to find the best bull for your program.
